

Pallet Wall Instructions

Questions? Call Monday -Friday, 8AM - 5PM EST 800-622-1331

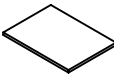

Installation video at www.waddellfurniture.com

Tools Needed:

- Pencil
- Power drill
- 3/16" drill bit
- Phillips head driver bit
- Flat head screwdriver
- Tape measure
- Level

-For the most secure mounting, use as many studs as possible. If studs cannot be found, use toggle anchors.

Included in box:

| Quantity | Item Description | Image |
|----------------|----------------------|---|
| 1 | Pallet Wall Unit |  |
| 2 | Mounting Angle |  |
| 4 | #8 x 2-1/2" Screw |  |
| 1-38" 2-63" | Large Pallet Shelves |  |
| 2-38" 4-63" | Small Pallet Shelves |  |

For the most secure mounting, use #8 x 2-1/2" flat head self-tapping screws fastened directly into wall studs. If wall studs can not be hit use of wall anchors is needed.

Note: These instructions are intended to be used for mounting a Pallet unit to the wall while resting on the floor. For mounting Pallet Wall suspended on a wall, please contact customer service to order the Pallet Wall Hanger accessory kit.

Installation instructions:

1. Position Pallet Wall at desired location. Scribe a line along the top of the unit and set aside.
2. Mark position of wall studs on the scribed line; We recommend spacing the mounting angles to align with as many studs as possible.
3. Securely fasten the mounting angles to the wall by placing the large slot against the wall, locate the screw at the top of the slot (Figure 1).
4. Slide the Mounting Angles up so the screw is resting at the bottom of the slot and place the Pallet Wall unit back into position against the wall.
5. Secure the Mounting Angles to the Pallet Wall making sure the angles are flush to the top of the unit (Figure 2).
